Professional Summary

Results-driven Python Full Stack Developer with nearly 3 years of experience developing dynamic, responsive web applications using Python, Django, Django REST Framework, React.js, JavaScript, and MySQL. Skilled in designing and developing RESTful APIs, implementing authentication and role-based access control, building reusable UI components, and integrating frontend and backend systems. Experienced in database design, application performance optimization, debugging, and Agile development practices, with a strong focus on delivering scalable, secure, and maintainable software solutions.

Technical Skills

Frontend:React.js, JavaScript (ES6+), HTML5, CSS3, Redux, React Hooks, React Router, Bootstrap, Formik, Yup
Backend: Python, Django, Django REST Framework, RESTful APIs
DataBase: MySQL
Authentication: JWT Authentication, Role-Based Authentication, Google Authentication
Tools:Git, GitHub, Postman, VS Code

Experience

Software Developer December 2023 – Present
GT Software College *Coimbatore*

- Developed and maintained backend applications using Python, Django, Django REST Framework, and MySQL.
- Designed and implemented RESTful APIs using serializers, validators, generic views, and ViewSets.
- Implemented JWT authentication and role-based access control to secure application endpoints.
- Developed database-driven business modules, including payroll and branch-based reporting.
- Integrated backend APIs with React using Axios, handling loading states, errors, and API responses.
- Tested APIs using Postman and improved error handling and application reliability.
- Implemented Redis caching to reduce redundant database queries and improve application response times.
- Used Git, GitHub, and Git Flow to manage source code and collaborate with team members in Agile development cycles.
- Developed reusable React components and applied performance optimization techniques where required.
- Mentored interns in Python, Django, React.js, API development, and debugging.

Achievements

- Delivered application modules across CRM/ERP, payroll, and logistics projects to support business operations.
- Improved React page load time by approximately 25% through lazy loading, code splitting, and component optimization.
- Improved deployment reliability by integrating front-end builds into CI/CD pipelines using GitHub Actions
- Improved application reliability through REST API integration, debugging, and frontend-backend error handling.
- Mentored 50+ interns in Python, Django, React.js, and full-stack development.
- Received appreciation from management and clients for delivering quality solutions within project deadlines.

Projects

Task Generation and Assessment System | Live Demo
Technologies: Python, Django, Django REST Framework, MySQL, HTML, CSS, JavaScript, Email Integration

- Developed a full-stack application to generate and assign random programming tasks to interns.
- Automated task distribution by sending assigned tasks to interns via email.
- Implemented aptitude test assignment functionality to evaluate interns' logical reasoning skills.
- Developed REST APIs using Django REST Framework to manage tasks, tests, and assessment results.
- Built user interface pages for task management, assignment tracking, and assessment results using Django templates and frontend technologies.

Mini Projects

- Expense Tracker
- Invoice Generator
- Todo App
- Library Management System
- BMI Calculator

Education

Anna University, BIT campus — Thiruchirappalli
Bachelor of Technology, Information Technology — *Sep. 2008 – June 2012*
CGPA:7.5

M.A.M Higher Secondary School — Mettur
Higher Secondary — *June. 2007 – May 2008*
Percentage:90%
